EDUCATION

2021

COVENTRY UNIVERSITY

Softwarica College of IT and E-Commerce

- BSc (Hons) Computing

2017

KAMALA HIGHER SECONDARY SCHOOL

Higher Secondary Education Board (HSEB)

- Higher Secondary Education

TRAINING

- Oracle 11g
- Business Intelligence
- Data Analyst
- US Healthcare training

PROFILE SUMMARY

Business Systems Analyst with a strong background in data engineering and analysis, specializing in US healthcare data and technology solutions. Skilled in requirements analysis, process improvement, stakeholder collaboration, and translating business needs into effective technical solutions.

WORK EXPERIENCE

IQVIA

Business Systems Analyst 2 (Senior Business Analyst)

April 2026 – Present

- Gather, analyze, and document business, functional, system, and data requirements through BRDs, FRDs, user stories, data mappings, and business rules.
- Translate business needs into clear functional and technical specifications, working closely with Product Owners, stakeholders, and engineering teams.
- Lead requirements workshops, stakeholder discussions, solution walkthroughs, and review sessions to align business objectives with technical solutions.
- Manage requirements throughout the project lifecycle, including prioritization, change requests, impact analysis, and solution validation.
- Analyze business processes and identify opportunities for process improvement, workflow automation, and operational efficiency.
- Leverage Cursor AI and rapid prototyping to develop mockups, proof-of-concepts, and functional demonstrations for early requirement validation.
- Analyze complex datasets and apply data modeling techniques to identify data issues, business gaps, trends, and improvement opportunities.
- Collaborate with ETL and engineering teams to design, validate, and enhance data pipelines and transformation logic.
- Coordinate UAT, test-case reviews, defect management, and solution validation while supporting Agile/Scrum delivery and backlog refinement.
- Create data-driven reports and dashboards, provide feature sign-off, and mentor junior team members while promoting business analysis best practices.

IQVIA

Data Analytics Analyst 2 (Senior Data Engineer)

January 2026 – April 2026

- Designed and implemented data processing and Extract, Transform, Load (ETL) workflows for large US healthcare datasets.
- Collected, cleaned, validated, and transformed data from multiple sources to keep reporting accurate and consistent.
- Mapped data fields into standardized schemas for member demographics, relationship codes, and member-months.
- Developed standardized data elements with in-house transformation tools for analytical reporting.
- Analyzed large datasets with Structured Query Language (SQL) and statistical methods to produce insights.
- Automated data processing and workflow tasks using Python and Apache Airflow.
- Documented data processes, methodologies, and mapping logic for repeatability.
- Lead a team and coordinated data deliverables.
- Guided junior team members and supported decisions on data implementation.
- Followed organizational data quality, data validation, governance, and compliance standards.

SKILLS

- Business Analysis
- Requirements Elicitation & Analysis
- Process Improvement
- Data Analysis
- Stakeholder Management
- Solution Design
- Technical Documentation
- Cross-functional Collaboration
- Agile / Scrum Delivery
- UAT & Solution Validation
- Dashboarding & Reporting
- Quality Assurance

TECHNICAL

- SQL (MSSQL, MySQL, PostgreSQL, Oracle, Amazon Redshift, PL/SQL)
- Python, PySpark, Apache Airflow
- Databricks, Snowflake, dbt, SSIS
- ETL/ELT, Data Pipelines, Data Warehousing
- Tableau, Tableau Prep, Power BI
- Microsoft Excel, PowerPoint
- REST APIs, Git, Cursor
- JavaScript, Node.js, React, PHP, WordPress

DOMAIN

- US Healthcare Data
- HIPAA-Regulated Data
- Healthcare Data Standards
- HEDIS, HCC
- ICD-10, CPT, HCPCS, NDC, Taxonomy

WORK EXPERIENCE

Cedargate

Data Engineer

March 2022 – Dec 2025

- Analyzed US healthcare data to support Extract, Transform, Load (ETL) process implementation and data delivery.
- Interpreted and analyzed data using statistical techniques.
- Cleaned, converted, and aggregated data from multiple sources.
- Mapped fields into a common schema and matched member information across data sources.
- Standardized relationship codes, member demographics, and member-months.
- Followed organizational data processes and quality standards.
- Assisted, reviewed, and trained Associate Data Engineers.

Impetus Incorporation (Avionte)

Junior Data Engineer

February 2021 – March 2022

- Troubleshoot and diagnosed customer-reported issues across the Avionte application, application database, and reports.
- Responded to customer tickets and technical requests.
- Participated in on-call rotations during server maintenance.
- Collaborated with cross-functional teams to resolve technical challenges.
- Documented troubleshooting steps and solutions.

Iceberg Technology

Web Developer

February 2018 – January 2020

- Developed and customized WordPress themes and plugins.
- Created graphics for web projects and supported search engine optimization.
- Managed website hosting and related deployment work.

PROJECTS

Research Thesis — Data-Driven Technology and Digital Education

Completed a BSc major project on the impact of digital education technologies using online transaction processing (OLTP), online analytical processing (OLAP), and data visualization. Supervisor: Manoj Shrestha.

Doctor Appointment System

Built an Android client and web Application Programming Interface (API) for appointment workflows.

[Android demo](#) · [Web API demo](#)

Panchasil Management System

Developed a web system using React and a Representational State Transfer Application Programming Interface (REST API). Role: Developer.

[Demo](#)

Smart Prison and Smart Dustbin

Built Internet of Things (IoT) prototypes for smart prison and smart dustbin use cases.
